**John J. Johnson**  
Executive Director

**George W. Stinson**  
Chair

December 4, 2008

Dear Sirs and Madams:

I am pleased to present to you the *Minority Educators in Kentucky's Public Schools* report that sheds light on the status of minority educators and students in Kentucky's 174 school districts.

For the past 40 years, the Kentucky Commission on Human Rights has published research reports that deal with equality issues in order to assist officials and the public to raise awareness. Our governing statute, The Kentucky Civil Rights Act (KRS344), mandates our production of such reports.

This report illustrates the shortage of minority educators in Kentucky's public schools. Although the shortage is a national trend, the state of Kentucky has fallen behind many others.

The Commonwealth of Kentucky is aware of the minority educators' shortage and has placed many programs to overcome it, but the problem persists. This report is an invitation to public officials and all Kentucky citizens to evaluate the current programs in place and creatively design new ones that attract minority students to become educators. Overcoming the shortage of minority educators is a crucial task that requires our immediate attention.

We believe that integrating diversity in Kentucky's public schools and other educational institutions will enrich the experience of all students, challenge stereotyped perceptions, enable students to communicate effectively with people of other backgrounds, and strengthen our communities.

Sincerely,

John Johnson  
Executive Director

## INTRODUCTION

According to U.S. Department of Commerce data, more than one-third of the students in today's public schools are members of minorities. By the year 2025, at least half will be minority students. Meanwhile, only 13 percent of their teachers belong to minorities. More than 40 percent of the public schools across America have no minority teachers on staff.

The Southern Regional Education Board reports that there are nearly 18 million African American, Asian, Hispanic, and Native American students attending elementary and secondary schools in the United States. Minority students account for 43 percent of the students in the Southern Region while only 21 percent of their teachers are members of minorities. Moreover, according to the Board, the majority of states in the south have experienced a decrease since the late 1980's in the percentage of minority teachers.

Kentucky joins this nationwide trend of declining percentages of minority teachers. Kentucky's minority figure is below the national average of 7 percent. Surprisingly, a half-century ago, in 1953-54, there were proportionately more African American teachers than in 2007-08.

Although Kentucky has many policies and programs in place for recruiting minority educators, only 4 percent of public school teachers belong to a minority, yet approximately 14 percent of the student population is minority. Within the last four years, there has been an increase of only .05 percent in the hiring of minority teachers, but meeting this was a simultaneous .05 percent decrease due to attrition and retirement; the result was, therefore, no overall change.

This report provides statistical information on the shortage of educators in Kentucky school districts. It presents several tables to illustrate the problem in each school district. There are tables presenting the ethnic and racial makeup of students in order to help make clear the level of disparity of minority teachers compared to minority students. The report also compares Kentucky to its neighboring states concerning the percentages of minority teachers.

Although much literature on the subject of education refers to an "educator" as an individual who is a teacher, principal, assistant principal, or other education professional such as a school counselor or social worker, in this report, the term, "educator," refers to a teacher. The document refers to all other categories as "certified staff."

## GENERAL KENTUCKY EDUCATION FACTS<sup>1</sup>

*The following is basic statistical information about Kentucky's public schools (K-12). State statutes and regulations direct Kentucky's public school system. All numbers are for the 2006-07 school year unless otherwise noted.*

- Number of school districts: **174** (28 female superintendents; 146 male; 2 minorities) [2007-08]
- Number of public schools<sup>2</sup>: **1,238**
  - Elementary – 751
  - Middle – 222
  - Elementary/Middle – 3
  - High – 225
  - Entering Primary-12th – 6
  - Preschool – 30
  - 9th Grade – 1
- Number of public school teachers (actual headcount): **43,641** (White – **95.6%**; Minority – **4.4%**; Male – **21%**; Female – **79%**)
- Number of public school students: **668,337**
- Ethnicity of public school students:
  - White - 84.2%
  - African American - 10.6%
  - Hispanic - 2%
  - Asian - less than 1%
  - Native American - less than 1%
  - Other - 1.7%
- Length of school year [2007-08]: 187 days (includes 177 days of instruction; 4 days of professional development; 4 holidays; 2 planning days)
- Number of employed certified staff, minus teachers (actual headcount): **7,824**
- Average teacher salary: \$44,365
- Number of teacher interns: 3,421
- Number of principal interns: 270
- Number of individuals who hold certifications: 112,477
- Number of classified staff (actual head count): 48,363

<sup>2</sup> Does not include dependent districts Ft. Campbell and Ft. Knox, alternative schools or the Kentucky School for the Deaf and Kentucky School for the Blind

- Average per-pupil current expense spending (excludes debt service, facilities and fund transfers): \$7,914 [2005-06]
- Total SEEK budget: \$2.681 billion [FY 2007]
- Total P-12 state education revenue: \$4.209 billion [FY 2007]
- Total P-12 federal education revenue: \$704 million [2005-06]
- Total P-12 local education revenue: \$1.783 billion [2005-06]
- Number of local school board seats: 874 (5 for each district; Jefferson County has 7 because of its size; Webster County has 7 on a temporary basis because of the merger of Providence Independent.)
- Gender breakdown of local school board members: Male - 539 (62%) Female - 334 (38%) Not Reported - 1 (less than 1%)
- Racial breakdown of local school board members: White - 813 (93%) Non-White - 37 (4%) Not reported - 24 (3%)
- Number of schools served by councils: 1,186 (22 granted exemptions -- 10 because of test scores; 12 in one-school districts)
- State dropout rate: 3.31% [2005-06]
- State retention rate: 2.92% [2005-06]
- State attendance rate: 94.6% [2005-06]
- State graduation rate: 83.26% [2005-06]
- Percentage of high school graduates attending college, vocational/technical schools, entering the military, employed or a combination of the above (successful transition rate): 96.06% [2005-06]
- Pre-kindergarten (preschool) children enrolled in state-funded programs: 23,072 (includes children who meet eligibility criteria and children served through district funds or tuition)
- Number of students enrolled in Kentucky Head Start programs: 14,432
- Number of kindergarten programs offered by 175 school districts: Full day: 150; Half day: 19; Both: 6
- Percent of individuals eligible for free or reduced-price meals (includes K-12 students; preschool/Head Start students; some adults who qualify through the National School Lunch Program): 53%
- Number of exceptional children ages 3-5: 21,007 [as of December 2006]
- Number of exceptional children ages 6-21: 88,347 [as of December 2006]
- Number of students qualifying for Gifted & Talented services: 113,484 Gifted & Talented state budget: \$7.1 million [FY 2007]
- Number of public schools operating federal Title I<sup>3</sup> programs: 884 (Schoolwide -- 795; Targeted Assistance -- 89) [2005-06]
- Title I funding: \$205.6 million [FY 2006]

---

<sup>3</sup> Title I: Improving The Academic Achievement of the Disadvantaged: This program provides financial assistance through State educational agencies to local educational agencies and public schools with high numbers of poor children to help ensure that all children meet challenging State academic content and student academic achievement standards.

- Number of students eligible for Title III<sup>4</sup> services (limited English proficiency, immigrant): 10,535
- State funding for limited English proficiency (LEP) students: \$2.9 million [FY 2007]
- Federal funding for Title III (includes LEP and immigrant students): \$3.1 million [FY 2007]
- Districts receiving Title III funding: 173 (plus individual sub-grantees and consortia sub-grantees)
- Languages, other than English, spoken at home by students with limited English proficiency:
  - Spanish (64%)
  - Japanese (4%)
  - Bosnian (4%)
  - Vietnamese (3%)
  - Arabic (2%)
  - French (2%)
  - Mandarin Chinese (2%)
  - Somali (2%)
  - Others, including Serbo-Croatian, Russian and Korean (approximately 18%)
- Students to modern high-performance computers ratio: 3.44-1 (goal is 6-1)
- Teachers to modern high-performance computers ratio: 1-1 (goal is 1-1)
- Percentage of networked schools with Internet access, email and direct dial-in/out telephone access: 100% (all 174 district offices have access to email and Internet)
- Percentage of schools connected to the Kentucky Education Network (KEN), a modern high-speed connection to the Internet: 100% (by December 2007)
- Percentage of schools utilizing Encyclomedia, an Internet-based comprehensive multi-media learning service: 92%
- Number of Highly Skilled Educators: 46 (all assigned)
- Number of family resource/youth services centers: 820 (420 family resource; 268 youth services; 132 combined)
- Number of Community Education directors: 102
- Number of school districts served by Community Education programs: 152
- Number of school buses: 9,976
- Number of licensed school bus drivers (full-time equivalent): 12,292
- Number of homeschools: 9,578
- Number of homeschooled students: 11,055

---

<sup>4</sup> Title III is a U.S. Federal Grant Program to improve education. The program has began as part of the Higher Education Act of 1965, which sought to provide support to strengthen various aspects of the schools through a formula grant program to accredited, legal authorized Historically Black Colleges and Universities.

# Minority Educators in Kentucky's Public Schools

## AN OVERVIEW OF THE MINORITY EDUCATORS IN KENTUCKY'S PUBLIC SCHOOLS

### NATIONAL TREND

Almost in every state, the number of minority educators is not increasing as fast as the ever-growing number of minority students. This problem is not new; it has been around since the early 1980s.

In the 1990s, as the number of minority students grew substantially, many states developed several ways to tackle the shortage of minority educators, such as scholarships and incentives for minority students to attend college after high school and intensive recruitment of minority educators. The outcomes were not as expected; the gap between minority educators and minority students enrolled in public schools grew even bigger.

It is estimated that 49.6 million students were enrolled in public elementary and secondary schools in 2007-08. Minorities constitute 42.4% of the total students enrolled (African American 15.6%, Hispanic 19.7%, Asian 3.7%, and American Indian .7%). Only 13% of their educators are minorities, and about 40% of U.S. public schools have no minorities on their staff.

### WHAT THE STATE IS DOING TO HIRE MINORITY EDUCATORS

#### *Early Recruitment Plans*

Since June of 2001, state law KRS § 161.165 requires the Kentucky Department of Education in cooperation with the Education Professional Standards Board, the Kentucky Board of Education, local school districts, universities, and colleges, and the Council on Postsecondary Education to review and revise, as needed, the strategic plan for increasing the number of minority teachers and administrators in the Commonwealth. The plan includes, but is not be limited to, recommendations on ways to:

- Identify methods for increasing the percentage of minority educators in proportion to the number of minority students;
- Establish programs to identify, recruit, and prepare as teachers minority persons who have already earned college degrees in other job fields;
- Create awareness among secondary school guidance counselors of the need for minority teachers.

*Recruitment Plans*

Any time that a vacancy occurs in a Kentucky public school district, the superintendent is required to conduct a search to locate minority teachers to be considered for the position. In addition, annual reports must document every district's recruitment process and activities used to increase their number of minority teachers (KRS § 160.380).

*Teacher Preparation Programs (Grants Awarded to Institutions)*

Institutions of higher education are not eligible to receive funds from the Council on Postsecondary Education for the purposes of teacher education or model programs of teaching and learning unless an active recruitment plan for attracting and retaining minority faculty and students has been established, particularly in the department, school or college of education (KRS § 164.097).

*The Congressional Teacher Scholarship Program/Paul Douglas Teacher Scholarship*

The program provides maximum awards of \$20,000 to full-time undergraduate students in programs leading to initial teacher certification at the pre-kindergarten, elementary or secondary school level. Although this scholarship is not specific to minority candidates, students from low income, economically disadvantaged and minority population groups are actively recruited.

The table shown below illustrates policies adopted by many states; Kentucky appears to be an active state in institutionalizing minority recruitment policies.

*States Policies to Recruit Minority Teachers<sup>5</sup>*

Note: Numbers in parenthesis by the state abbreviations indicate the number of "different" policies in that specific category.

## WHAT THE ACTUAL DATA REVEALS

According to the Department of Education Action Plan, the Division of Educator Recruitment and Retention is responsible for collecting data and providing an annual report on gains made in the hiring of minority educators in the state's public schools. The Minority Educator Recruitment and Retention (MERR) reporting process requires public school districts to identify the number of vacancies, minority candidate interviews, and positions filled by minority candidates, according to Stephen Schenck, Associate Commissioner Office of Leadership and School Improvement.

Annually, school district superintendents are required to submit a report including the educator recruitment plan, strategies and sources of recruitment, vacancies, positions filled (teacher, principal and administrator) and the number of minority educators interviewed and hired, pursuant to 704 KAR 7:130.

The result of the data collected indicates the percentages of minority educators included in the total number of teachers hired. Currently, 4% of Kentucky's public school teachers are minorities. Approximately 15% of the student population is minorities. Within the last four years, there has been an increase of only .05% in the hiring of minority teachers. This was followed by a .05% decrease in minority teachers due to attrition and retirement. The result was no change, overall, according to Schneck. Minority principals make up approximately 5% of the total number of principal positions filled in 2006. Principal positions filled by minorities indicated that 63 were African-American, 1 was Asian Pacific Islander/Alaskan Native and 1 was Hispanic.

## Kentucky's Largest County -- Jefferson

As of 2006, the Jefferson County population was estimated by the U.S. Census Bureau to be 701, 500. The minority population constitutes 26.3 % (African American 20.2%, Asian 1.8%, Hispanic 2.6%, American Indian and Native Hawaiian, both, consist of .4%).

According to the 2006-07 SAAR (Superintendent's Annual Attendance Report) Enrollment Report, 91,425 students were enrolled in Jefferson County public schools, 49,832 were white (54.5%), 32,764 were African American (35.8%), 2,064 were Asian (2.26%), 3,657 were Hispanic (4%), and 117 were American Indian (.13%).

For the same year, Jefferson County had 6,128 educators of which only 15.60% were minority (the statewide average is only 4.3%). Therefore, the majority of teachers (84.4%) were white and only 14.33% were African American, .65% were Asian, .57% were American Indian, and .05% were Hispanic.

## Other Counties

Out of 174 school districts in the state, only 7 had over 10% minority educators (see *table 1*):

- Jefferson County: 15.6%
- Providence Independent: 13.7%
- Paducah Independent: 11.9%
- Fayette County: 11%
- Russellville Independent: 10.9%
- Paris Independent: 10.9%
- Fulton Independent: 10.8%

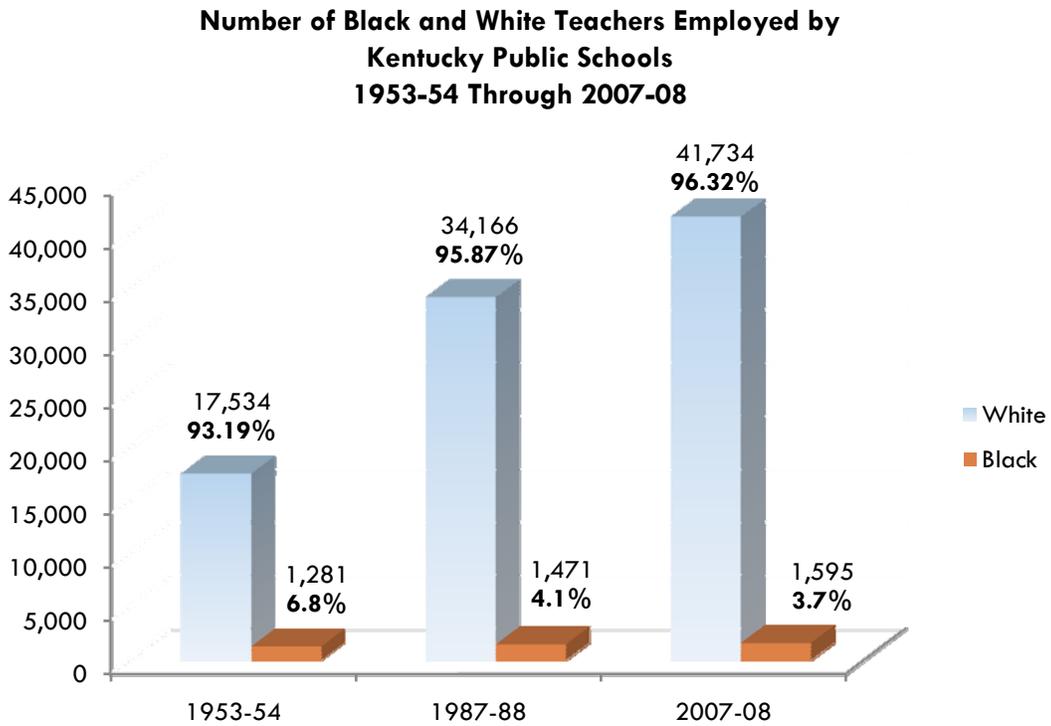

Only 10 school districts had percentages of minority educators between 5% and less than 10%:

Christian County: 9.5%	Bowling Green Independent: 8.4%	Eminence Independent: 7.6%
Covington Independent: 7.3%	Elizabethtown Independent: 6.6%	Frankfort Independent: 6.5%
Hardin County: 5.5%	Murray Independent: 5.5%	Campbellsville Independent: 5.4%
Anchorage Independent: 5.1%		

Fifty-four Kentucky school districts had zero minority teachers.

## NO PROGRESS WAS MADE

In 1953-54, Kentucky public schools had 96 more black teachers than they needed to equal the percentage of black students. In the same school year (1953-54), 17,534 whites and 1,281 blacks (that is 6.8%) were teaching in public schools throughout the state. In 1987-88, there were 34,166 whites and 1,471 blacks (that is 4.12%) teaching in Kentucky's 178 public school districts. In 2007-08, there are 41,736 whites and 1,595 black (that is 3.7%) teaching in Kentucky's 174 public school districts. In other words, there was a decline of black teachers in Kentucky's public schools by 0.42% in the last 20 years and by 3.1% in the last half century. Therefore, the number of black teachers was higher 50 years ago.

## DESCRIPTION OF THE DATA TABLES

The following tables give detailed information about each of the 174 school districts.

1. *Table 1:* Summarizes all minority educators in each school district by gender and minority status.
2. *Table 2:* Breaks down the minorities (of educators) by white, African American, American Indian, Asian, Hispanic, and others.
3. *Table 3:* Represents certified staff, which includes educators, counselors, administrators, etc., anyone in a position that requires certification by the Kentucky Education Professional Standards Board.
4. *Table 4:* Gives the ethnic makeup of the certified staff.
5. *Table 5:* Represents the ethnicity of all students in Kentucky's public schools.
6. *Table 6:* Illustrates the percentages of minority students enrolled in proportion to minority educators from 1989 to 2000 in the southern states.

Summary of Table 1

- There are 45,546 educators in Kentucky's public schools. Only 4.37% are minorities.
- 55 school districts have zero minority people among their educators.
- 35 school districts have only one minority educator.
- 47 school districts have less than 5 minority educators.
- 29 school districts have less than 20 minority educators.
- 7 school districts have less than 100 minority educators.
- Jefferson County has 956 minority educators compared to 6,128 white educators and Fayette County has 294 minority educators compared to 2,651 white educators.
- The overwhelming majority of educators are females.

## Summary of Table 2

The 4.37% of minority educators is composed of:

- 3.7% African American
- 0.4% Asian
- 0.2% American Indian
- 0.03% Hispanic
- 0.1% Other

The 3.7% of African American educators is distributed in 94 school districts; however, 80 school districts have less than 10 African American educators. The 0.4% of Asian educators is distributed in 57 school districts in which 38 school districts have only one Asian educator. American Indian educators are distributed in 31 school districts in which 28 school districts have less than 3 American Indian Educators. There are only 14 Hispanic educators distributed in 9 school districts.

Summary of Tables 3 & 4

Table 3 captures the gender aspect of certified staff while table 4 presents their ethnic makeup. Both tables include the number of educators. By excluding the educators from both tables, we'll get the number and percentage of the rest of certified staff (administrators, counselors, etc.)

Figure 1: How Kentucky Compares to its Neighbors<sup>6</sup>

<sup>6</sup> Data was obtained from various sources: 1- IN, OH, TN, and WV Departments of Education. 2- U.S. Census Bureau. 3- U.S. Department of Education

## KENTUCKY IN A REGIONAL CONTEXT

Since much data concerning minority educators in Kentucky's neighboring states was not available, the table below gives us an idea of where Kentucky stands among the southern states. It is clear that Kentucky has only about 5% of minority educators, by far the lowest state, except West Virginia. The state of Kentucky has a long way to go. State policy makers and school districts must make serious efforts in hiring and retaining minority educators in order to achieve equal opportunity in Kentucky schools.

States that belong to the Southern Regional Education Board (SREB)<sup>7</sup>

## RECOMMENDATIONS

Minority student education does not necessarily require minority teachers, but diversity among teachers is very important to all students and parents. Minority teachers bring positive images and varied perspectives to their students. There is no doubt that the state has institutionalized many policies and programs to recruit minority teachers. Over the years, however, results show no noticeable progress. Some experts contribute the hurdles in recruiting minority teachers to a lack of interest on the part of minority college students in pursuing teaching as a career. A low salary level for teachers is a main factor contributing to this disinterest, experts conclude.

The Kentucky Commission on Human Rights believes that improving the recruiting of minority teachers offers win-win progress to white and minority students alike. White students would greatly benefit from exposure to successful professionals of diverse races and ethnicities in ways that affect their abilities to co-exist and prosper as business professionals in an increasingly diverse and global economy. Minority students, many of whom have historically struggled in school and come from low-income families, according to U.S. Commerce and other statistics, would gain in confidence, self-image and on several levels with the opportunity to receive instruction and interaction with members of minorities with whom they can closely identify and follow. Studies have already proven the benefit to minority and low-income students of having minority teachers in classrooms.

The problem of the severe shortage in minority teachers is a multidimensional one; therefore, it requires various approaches at different levels, simultaneously.

### Legislators

- Continuously revise program and policies with school districts.
- Increase funding for minority teacher recruitment programs (such as full or partial scholarships or affordable loans).
- Offer tax incentives for teachers.
- Increase school loan forgiveness to minority and low-income teachers.

### Educational institutions

- School districts should review the effectiveness and perform full evaluations of all policies and programs regarding minority teachers' recruitment. School districts should eliminate any policy or program that has shown to be ineffective.
- School districts should actively work to creatively design programs that help recruit minority teachers and submit them to legislators.
- School districts must be held accountable to show how actively they are working to recruit minority teachers.

- School districts should identify underperforming schools and struggling students (from low-income and minorities) and launch a campaign to work to get parents involved in establishing a sense of achievement and confidence in the student's educational experience.
- Increase active recruitment on-site at schools with high numbers of minority students.

### **Nonprofit organizations**

- Government and educational entities can play only a limited role to generate students' interest in teaching. Grassroots organizations can play an instrumental role to raise awareness to minorities about the importance of teaching.
- Nonprofit organizations that focus on minorities and low-income issues should launch an active campaign to motivate minorities to become teachers. These efforts must be coordinated with schools and school districts for optimum performance.
- Nonprofit organizations should not hesitate to confront popular culture messages as defined by the mass media. Messages that emphasize the need of students to accomplish educational degrees in order to successfully function and prosper as adults should resonate in the minds of minorities.
- Nonprofit and community organizations must feel that they are accountable and responsible and must tirelessly pursue the well-being of their youth.

### **The parents**

- The role of parents in their children's education is foundational. Success starts at home. The parents (especially of low-income and minorities) should play a broader role in creating a positive home learning environment, improve study habits of their children, and prepare them for middle school and high school.

Not all these roles of various entities can be carried out in isolation of each other. It is a system where each entity thrives on the feedback of another.
